

## DELUXE EDITION

# STORY OF THE GHOST

Written by Zane DeForest

## *PROLOGUE*

“Orders came threw,” Hera yells. Kannan says, “What are they Hera?”. Hera explains, “We must dock with Admiral Radis home one command ship.” Ezra says, “Is the princess there?” “Yes she is,” Kannan said.” Hera said, “We must protect the princess so she can escape with the plans to the Death Star.” I say, “Copy.” As the Tie Fighters moved in our ship was shot. We boarded the command ship as fast as we possibly could. As we ran to the ship there was Darth Vader. Kannan says, “Ezra rember your traning and trust the force always.” I say, “May the force be with us.” Vader made the first move choking Kannan, I moved in I struck my lightsaber at him and he pushed me away to the floor. Kannan made the ultimate scarfice, he used his lightsaber to close the door. Kannan yells, “Run now.” Kannan saved me. Vader didn’t kill Kannan but instead he took him to his Imperial Shuttle. I rember the sounds of Vader on the command ship slaughtering everyone in his path of victory. I remember the screams of fear and the loss of my fellow soilders and my

master Kannan. Hera yells at me, "Lets go now, we have to go now Ezra." I say, "I am coming." We boarded the Ghost and we abandoned Kannan for now. Some of the best tie fighter pilots I have ever seen are on this planet, the planet of Scarif. Were are retreating along with the rest of the Rebel Alliance fleet. A Tie Fighter shot a ion torpedo at our ship. Hera yellls, " Were hit the Ghost is no longer stablized, get to the Phantom now all of you." "Were on it Hera." Sabine and Zeb yell back. As Sabine, Zeb and I got in the Phantom, Hera is climbing the latter up, and the Ghost ship got shot and Hera fell down the ladder. Hera ordered Sabine to leave her but it was to late a Rebel Blockade Runner picked up the Ghost and the Phantom was launched into hyperspace with unknown cordinates in the nav computer. At least Sabine, Zeb and I know Hera is with the rebellion.

# ***STORY OF THE GHOST***

***WRITTEN BY ZANE DEFOREST***

## *CHAPTER 1*

The jump threw hyperspace was a long boring time. Sabine says, “The nav computer is damaged and we will be jumping out of hyperspace no time soon.” Zeb comments, “Carrabst” I say, “At least we are ok, we have each other for now. Zeb says, “I shure wish Kannan were here.” I say, “I do to buddy.” I say, “Sabine will you be able to fix the nav computer?” Sabine answers, “Yeah it is fixable Ezra.” The batle of Scarif was a loss and a win for the rebellion I thought. Without Kannan we were flying blind without a leader. Sabine yells, “We are coming out of hyper space fast brace yourselves for impact!” Zeb says, “Wait I’m not ready to wreck.” Sabine says, “Hold on” I say, Sabine pulls the ship up as fast as she could. Sabine says, “Were safe for now its not a imperial outpost, it’s a hanger in the middle of no where.” Zeb says, “There is a imcoming transmition.” Play it through Zeb ill talk to them.” I say. “Hello unidentified cargo shuttle my name is Ferlac owner of this hanger.” I say, “Hi Ferlac my is Ezra Bridger our ship has been damaged can we dock in your hanger to make repairs?” Ferlac answers, “You may do your repairs in Hanger 31 in the mid ring.” Sabine says, “Yes we can dock and make our repairs.” “Good work kid.” Zeb says, “Thanks Zeb” I say. As we landed I imanged the hanger to be a ugly

dirt ball but it was a nice hanger bay with nothing in it. The hanger was prestiene as a senate building. As we landed I saw 3 B-1 battle droids, we landed I was nervous I took my blaster and I shot down one of the battle droids. Sabine yells, “No Ezra those were the Ferlac the owner he reprogramed them.” I say, “How do you know this Sabine?” Sabine answers, “Ugh he just contacted us and said he is coming along with a squad of droid esscort.” I drop my voice and I say, “Oh opps sorry Sabine.” I saw someone come in and it must of have been Ferlac I thought he would be Human, but he wasent he was a Pau’an. “What happened here my droid!!” Ferlac yells. I say, “I am so sorry Ferlac, we have been through a lot today.” Zeb says, “We have seen battle droids that tried to kill us before and they had a blaster.” Ferlac yells, “You kids make your repairs and leave here.” Zeb answers, “Yes sir.” Ferlac says, “Is that a old sepertist transport you have there?” Sabine answers, “Shure is one of the best transports there is.” Ferlac says, “Are you selling those are very valuably these days.” Sabine answers, “Not for sale it is the only ship we own.” Ferlac says, “Well if you need assistance on your ship go see the Freemakers they live here on the Wheel.” Zeb says in question, “Who are the Freemakers?” Ferlac answers, “They are some of the best mechanics I know.” I say, “Can they fix our ship?” Ferlac answers, “If you have enough credits they will.” “Thanks for tip Ferlac.” Sabine says, Ferlac and his two B-1 battle droids left the hanger. I say to Sabine and Zeb “We should go and see the Freemakers.” Zeb says back “We need to see them if they

can fix our ship and get us out of here.” Sabine says, “I know we need to make our way to Yavin IV” “Then lets go see the Freemakers.” I say.

## *CHAPTER 2*

Sabine says, “Everyone come on we have to go to see the Freemakers.” “Were coming Sabine.” Zeb said, Sabine looked at the fuel tank, she says “It is already all most empty.” I answer, “We better get to the Freemakers fast.” We started the ship and we took off. As we fly out there is traffic every where. We are going as fast as we can.” Sabine said. Zeb yells, “There is there the Freemakers shop.” Sabine flew into their shop.

We landed the Phantom in the shop there was scrap every in the shop, there was a large ship about the size of the Ghost. Telling by the shop and the ship the, Freemakers must be salvagers. A young lady who looked a little older than me approached our ship with a old vintage battle droid. Sabine said to me, “Ezra don’t you destroy that battle droid or we will have to pay for it.” I answer, “Ok I won’t, it dosent have a blaster any way.” We walked out of the Phantom and there was the

young lady. "Hello my name is Kordi Freemaker from Freemaker salvage and repair." I say, "Hello Kordi my name is Ezra and these are my friends there is Zeb and Sabine." Hello Zeb and Sabine said to Kordi. "Do you think you can fix our ship?" I say. Kordi answers, "What is wrong with the ship?" Sabine answers, "The nav computer is destroyed, the hyperdrive is shot, and the exhaust from the engine is coming inside the ship." Kordi says, "Well its going to be a big project but we will be able to fix it and its going to cost a lot." Zeb yells, "How much is it going to cost?" Kordi says, "Well when we add the repairs and cost for the parts it will cost 2495 credits." Zeb says, "By the Ashla." Sabine answers, "We will pay it in full." Kordi says, "Well then it is settled our customer service droid Rodger will entertain you." "Zander, Ronin get down here we have a job!" Kordi yeled.

When Zander and Ronin came over to our ship they got right to work. "Right this way customers." Rodger said. We sat down in the customer service room of their shop. We talked about the expinsives we would only be left for a few credits left. Soon Zander Freemaker walked in the Customer service room. Zander said, "We have a big probem." Zeb said , "What is the probem?" "I don't know what your ship has gone through but the is series damage to the maps." Sabine says, "What is wrong with them" Zander answers, "All cordinates in the map are gone the maps don't exist anymore. What happened to you guys?" Sabine says, "We can say the

Empire doesn't like us much, we resist the Imperial rule." Zander says, "Oh no that means you guys are rebels aren't you?" Zeb says, "We are Rebels, a tie fighter shot a ion torpedo at us." Kordi ran in and said, "No no no, we can't help rebels we don't need trouble from the empire get out of our shop." I say, "We will pay you extra and if the empire finds out you helped us we can help hide you and your brothers." "Fine it is a deal." Kordi says. Zander and Ronin got back to work on the Phantom, I knew some coordinates we could go to but it would not be too safe. Soon after a long while Kordi Freemaker walked inside the customer service room and she said, "Your ship is done, I believe the maps will not be the same again without map coordinates and they cost a lot." I say, "That is ok Kordi I know some coordinates." "Ok will thank you for coming to our shop." "Welcome" I said. Zeb, Sabine and I went over to the Phantom and we shut the door. Zeb said, "Ezra what coordinates do you know if you don't know the coordinates to Yavin IV?" I answer, "I may not know the coordinates to our base but I know the coordinates to Lothal."

## *CHAPTER 3*

As we left the wheel Sabine, Zeb, and I thought where would we go now without the coordinate map, we would have to know coordinates to planets instead of using the coordinate map. “Ezra what planet did you just say?” Sabine said, I answer, “I said Lothal, I know it is not safest place but I have a plan.” Zeb said, “What is your plan then Ezra?” I answer, “My plan is to slip through the imperial fleet and steal a coordinate map for the Phantom and get out of the planet and get our way back to Yavin IV.” Sabine says, “It is a good plan Ezra but one issue.” I say, “What is the issue Sabine?” Sabine answers, “The issue is the imperial fleet and security.” Zeb says, “We can bust some buckets heads then.” Sabine says “I guess were going back to Lothal.” I said, “I will put in the coordinates to Lothal. “Sabine punch the hyperdrive.” “On it Ezra.” Sabine said. Were on our way to Lothal again, hopefully we can help the people of Lothal.

Meanwhile over Lothal, An Imperial officer said, “Admiral Constine.” “What is it officer?” Admiral Constantine said. The officer answers, “A small vessel is dropping out of hyperspace.” Constine answers, “Scan the vessel at once it may be the Rebel craft we are looking for.”

“Ezra be ready to man the cannons.” Sabine said. Zeb said, “We’re getting a transmission from the star destroyer.” “I will answer it.” Sabine said, “Attention Rebel craft you are under arrest in the name of the Galactic Empire.” Zeb says, “Oh no they know that it is us Ezra.” “Man the cannons Ezra there are tie fighters.” Sabine said.

The tie fighters shot their green turbo lasers at our ship they missed everytime just like the bucket heads do. Sabine says, “We are now making our way into the planet.” Zeb said, “Watch out Sabine look two tie fighters, and is that a walker.” I say back to my friends, “It is but their not Imperial there a part of rider Azadia group of Rebels.” The Rebel tie fighters were painted green and blue for the colors of my home the planet of Lothal. A transmission was coming through. The person on the transmission said “Hello Ezra Bridger.” I answer, “Hey Rider Azadia were in trouble

the empire is chasing us.” Rider answers, “I know my pilots will deal with the empire, follow the AT-DP it will lead you to our base.” I answer, “Copy Rider”. The Rebel tie fighters were fast and were good pilots and they shot down the tie fighters. We followed the ties and walker to Rider Azadia base and it was the old abandoned trade outpost the Zagu and his droids used. As we landed the Phantom, Rider Azadi came up to our ship he said to us, “Hey Ezra why did you come back to Lothal?” I said back to him, “We need your help now more than ever.” Rider answers, “What happened Ezra?”

## *CHAPTER 4*

“Ezra what happened?” Raider Azadi said. I answer, “We had an issue at the battle of Scarif.” Rider says, “What happened there?” I say, “The Empire used their planet killer on the planet, it killed our entire team.” Rider says, “I am so sorry Ezra.” Rider Azadi says, “I thought the rebellion had a victory with the theft of the Death Star plans.” I answer, “It was a good mission until our team called Rogue one died.” “The we were reatring and a tie fighter shot our ship, and Hera is with the rebellion.” Rider Azadi said, “Where is Kannan at?” I answer, “Kannan is in the clutches of the Empire, he got captured.” Rider said, “Oh lets contact your friends.” I say, “Thank you.” Sabine says to Rider, “The transmittion code is 4-4-4-8-2.” “Copy” Rider says. Rider says, “Im beaming out the trasmission but the empire has blocked the transmittions.” Zeb said, “We will need a new way to get a hold of the rebellion.”

Grand Admiral Thrawn was a powerful Admiral in the Imperial navy, the only Imperial military official that is non human. Admiral Constine says, "Officer get me in contact with the Grand Admiral." The officer answers, "Sir yes," Constine said, "Grand admiral Thrawn we have a situation on Lothal." Thrawn answers, "Ah Admiral Constine the Rebel attacks are a growing threat to the Empire. I will be on my way to Lothal and when I get here I will not allow the rebels to be a growing threat to this Empire anymore." Constine answers, "Yes Grand Admiral, I look forward to see you."

"Grand admiral Thrawn we are now approaching Lothal." The lieutenant said. Thrawn answers, "Ah soon as we arrive I will launch tie-defenders, and have them destroy the rebels." "Yes sir." The lieutenant says, "Grand Admiral we are getting a transmission from Admiral Constine." Grand admiral says, "Answer the transmission lieutenant." "Grand Admiral the Rebel presence is over the planet should I launch a team of stormtroopers on their base?" Thrawn answers, "No Admiral Constine I have a plan to tear apart the rebels."

Meanwhile back on Lothal at the Rebel base. Sabine says, “If we can’t contact our friends of our network, but we can contact our friends from the Imperial network.” I answer, “How can we possibly get in the imperial network?” Sabine answers, “We attack the imperial complex and get into their computers and then contact the rebellion.” Rider Azadi says, “It sounds like a plan and maybe we can take out the imperial factory and destroy that tie-defender factory.” Zeb says, “Will lets go and attack the imperial factory.” A rebel agent says, “Sir on are scaners we are scaning three star destroyers and two light cruisers.” Rider Azadi answers, “The empire sent another fleet over our planet, we need to attack the imperial complex now before things get worse here on Lothal.” I say “Rider I have a team to attack the complex.” Rider says, “I will be coming with you Ezra.” I answer, “Thanks Rider now we have a team lets get to the speader and make our way into town.” As we walked to our speader we starded the speaders engine and we took off into town.

As we drove into town the imperial tie fighters flew past us on the air way, I thought what could the empire be up to now. Rider Azadi said, “Everyone be ready for battle we are now entering the captial city of Lothal.” Zeb says “Were always ready for anything that comes our way.” A stormtrooper unit come and made our land speader stop. The stormtroper officer came to us and said, “What are you doing with thoes explodes?” As he ordered his troops to

seize our explosives. I said back to the trooper, "What does it look like we are doing with these explosives, we are going to blow up your base." Sabine grabbed her pistols and shot all the troopers before they could even try to shoot back at us. Sabine dropped one of the thermal detonators in the street where the stormtroopers were coming. As we approached the imperial complex the AT-DP started to fire upon our speeder, Zeb threw a thermal detonator at the AT-DP and it destroyed one of the two AT-DP's. I say, "Rider we need to get inside the complex fast before they shut the blast doors." Rider says, "I know Ezra, Zeb throw one of those grenades at the other walker if you want in you will have to stop that walker." Zeb says, "I am on it." Zeb threw the grenades and it took out the other walker. Rider Azadi drove into the complex and Sabine threw a smoke grenade so the imperials couldn't see us.

My team jumped out of the speeder and we started to place the thermal detonators around the complex. Sabine says "We need to make our way to the communication levels of the complex so we can contact our friends from the Imperial network." Rider Azadi says "Floor 4 is where the main communication is being held at." I say, "Then let's make our way there." Zeb says "Can I please donate these explosives." I say, "Sure thing whenever you want to you can buddy." Zeb says, "I'll donate them now." The explosives went

off on all of the three floors. We walked into the communication room and there are imperial officers everywhere and I ignited my lightsaber and I said, "Get out of here now." All of the imperial officers left the room. Sabine plugged in the communicator to the holo table and made a transmission signal to the Rebel alliance. The transmission was answered "This is commander June Sato who is this?" Sabine answers, "Commander Sato it is so good to hear your voice this is Spector five." Sato said, "Sabine where are you?" Sabine says, "We're on Lothal we need help to get off the planet." Sato answers, "I will send assistance at once for you." Sabine says "Thank you Commander." Commander says, "May the force be with you." As Sabine ended the transmission stormtroopers ran into the room and I ignited my lightsaber and I sliced the stormtroopers into pieces. Rider Azadi says, "We need to leave the complex now and make our way into the streets fast." Zeb shot the window open and he says, "Then let's go now." We climbed out of the complex and there were an imperial AT-DP in the street walking and I jumped up on top of the walker and I opened the hatch to get into the walker. I shot the pilot and our team got into the AT-DP. We started to move the walker out of town.

## *CHAPTER 5*

As we were driving the AT-DP out of town an imperial tie-fighter was flying over us and shot the walker. Sabine says, “When is the rebellion planing on getting here.” I say, “Wele you called them not me.” Rider Azadi say, “Look on the scaners I think the rebellion just arrived.” Zeb says, “That is them.” The rebel alliance was here with three Nebulon B medical frigits, four Alderan blockade runners, along with two hammerhead corvets. We drove our walker to our base and Rider started major evacuations for his base. We jumped in the Phantom and Sabine says, “We need to get up to the fleet now.” I say, “Contact Commander Sato.” Zeb says, “Rider Azadi and his crew have maps so we can jump to hyperspace.” Sabine says, “Contact Azadi.” As I contact Rider Azadi a message from the rebellion came threw it said “Hello ghost crew we are here make your way to the blockade runner.” I say to Sabine, “Lets just go to the ship and we can dock with them.” Sabine says “We will dock with the rebel command ship.” We flew up into space and there was the Ghost and we contacted it. I got into contact with the Ghost, “Hera is that you on the Ghost?” The ship answers back, “Ezra it is you, are you ok it is me Hera.” I say,

“We are ok we are going to dock with the Ghost.” Hera says, “Copy.” We docked with the ghost and we got out of the phantom. We were finally reunited with the rebellion and Hera. Hera says, “It is really good to see you all.” Zeb, Sabine, and I say “Good to see you to Hera.” Rider Azadi and his crew of rebels docked with the medical frigate. Hera says, “Let’s go back into the planet with those hammerhead corvettes.” “Why” I say. Hera says, “To get the people off the planet.” The hammerheads and us went into the planet and we landed our ships. Sabine says, “I will go into the capital city and get everyone who wants to leave to come with us.” Hera says, “Sabine and Zeb go and get the people to the ships fast.” I say to Hera, “What do you want me to do?” Hera says, “Prep the hammerheads for everyone to go off world.” I say, “Copy that Hera.” Sabine and Zeb came back on multiple transports and they were people from all over the planet were here and they walked up the ramps and into the hammerheads corvettes. Hera said, “We need to leave now before the Y-wings come in and bomb the imperial complex.” Zeb says, “Oh yeah finally an attack on the Empire.” Tie fighter came in and were firing upon our ships and we ordered the hammerheads to leave the system immediately and they did. Grand admiral Thrawn’s command star destroyer was firing upon our blockade runners and he destroyed one of them.

Meanwhile in the Star Destroyer, Grand admiral Thrawn says, “The rebellion they will send Y-wing bombers in the planet.” Admiral Constine says, “How do you know they will do that?” Thrawn says, “Because admiral, the rebels have the civilians aboard their transports and they are attacking our tie fighters and light cruiser on the planet.” Constine says, “I see Grand Admiral should I send Tie Defenders.” Thrawn says, “At once admiral Constine have the rebels be destroyed.”

Back on the planet of Lothal. Hera says, “Everyone man the cannons it looks like we have company.” Sabine says, “Tie defenders with heavy shields.” Hera sent out a transmission to Hobby and his unit of y-wings to attack the empire’s Tie fighter factories and the imperial complex. I saw it with my own eyes it was almost one of the beautifulist thing ever, Y-wing bombers came in the planet and they flew very slow and dropped their bombs on the capital city and they destroyed the imperial complex and the imperial factories. The capital city used to be my home and now it is nothing but rubble. The empire had my planet under their control for a very long time until today, until the day the rebellion strived with glory. I said, “Today is our day everyone lets go home.” Hera contacted the rebellion command ship and she said, “Admiral we need to make our way home now we have spector 4, 5, and 6 in the Ghost.” The admiral says, “Copy that General.” As we approached the fleet Grand admiral Thrawn’s command ship fired all its power upon the the medical frigates and

it destroyed one of our medical frigates. Hera contacted the fleet command and said, "All ships make your way to Yavin IV." The Rebel fleet jumped to hyper space and made its way to our base.

Grand Admiral Thrawn was furious that the imperial presence on Lothal was crippled by the rebel alliance. Grand admiral Thrawn says, "Admiral Constine do you know what this means." Admiral Constine says, "No sir." Grand admiral Thrawn says "This means you will be demoted to Commander for your failure against the rebels attacks." Admiral Constine replies, "What sir, you failed against the rebels as well Grand Admiral." Thrawn says, "No, no I did not I know what the rebel fleet will do next. I know how to defeat the rebels now once and for all." Admiral Constine says "I did not fail if you did not fail Grand Admiral." Thrawn says, "Troopers take former Admiral Constine away to the holding cells."

## CHAPTER 6

The Rebel fleet has just now exited hyperspace and I could not believe it, all the rebel groups were there from Phoniex squadren, the Alliance and all of the other rebels from around of the galaxy. We docked our ship with the Phoniex home one light carrier. As we docked our ship Commander Sato was wating for us at the docking ramp. As we walk down the ramp Comander Sato said “Congratuations Ezra Bridger of your succcess on Lothal.” I say “Thank you commander Sato.” Senator Bail Organa walked up to our ship.

Bail Organa said, “Hello Commander Sato it is good to see you.” He shacked his hand. Hera said, “Hello Senator it is good to see you.” Bail said, “Hello Hera” Bail said, “I have news, my spies from around the Galaxy have found where the Empire is taking Kannan.” I say, “Where is he?” Bail answers, “Ezra he is on Vaders castle on Mustafar.” I say, “Hera I will assemble a strike team.” Hera says, “Ezra no you won't, the Empire plans us to go to Mustfar, If we do go our fleet will be destroyed by the imperial navy.” I answer, “Your right Hera we can’t take the fleet

but Sabine and I can go in the phantom.” I say, “Come on Sabine lets go rescue our friend.” Hera races after us and says, "Stop you two we need to talk." I say, "Why so you can complain to us about how we care for our friend." Hera says, "No Ezra you must listen to me I have a plan to get Kannan back and it involves lying and most likely betrayal to the rebellion.” Sabine says, “Will what is the plan then?” Hera responds, “My plan.” Bail Organa came in the Ghost and he said “Ah Ezra I am glad you decided to stop.” I say, “Yeah.” Sabine says, “I cant belive the leader of the rebellion wolnt help out family.” Bail says, “I am sorry the rebellion will be in major defeat.” I say, “Yeah Sabine we just won a battle on Lothal we don’t need to fail on Mustafar, it is just one soilder.” Bail said, “General Hera we have a mission for you.” Hera says, “What is the mission?” Bail answers, “The mission is to steel this Imperial shuttle, we need it to get troops threw planets where Imperial’s are. I say, “We will do it sir.” Bail says, “Will thanks. Bail walked down the ramp and we closed the ramp doors. Zeb says to Hera, “So tell us your plan.” Hera says, “My plan is other rebels want to help get Kannan out of the clutches of the Empire, Fulcrum and his team will help us and so will Rider Azadi with the help of Commander Sato.” I said, “Wait Commander Sato wants to help us.” Hera answers, “Yes he did wanted to help us in secret.” Sabine says, “Ezra you can’t face Vader alone.” Hera says, “Your right Sabine, Ezra we will need some help.” I say, “Maul can help us.” Zeb says, “No, No Maul will not help us.” I say, “Zeb this is for Kannan.” Zeb says,

“Fine as long as next time we do this our selves.” I say, “This is a deal then buddy.” Hera started the engine and we flew out of the light carrier and four blockade runners, five GR75 Medium Transports along with two Nebulon medical frigates and our light carrier jumped to hyperspace. Bail Organa contacted the Phoniex home one light carrier and he said, “Commander Sato where are you going with that fleet.” Sato says, “I am going to help save my friend Kannan, he helped me and now I will help him.” Sato ended the transmission on the senator.

The rebel fleet just exited hyperspace over the planet Toydaria and there it was the Mandalorian fighter colored in red with blue stripes and it attacked the A-wing fighter. I contacted Maul and I said, “Maul stop we are not here to hurt you.” Maul replies, “Then why are you here.” I say, “We need your help to rescue Kannan.

Maul landed his fighter on our light carrier, we also landed inside the light carrier. Maul walked out of his ship, I was on nerve Maul is a powerful dark side user. I say to Maul, “Maul I need your help.” Maul answers “Why should I help Kannan.” I say, “Because if you help us face Vader and save Kannan I will become your apprentice.” Zeb says, “No Ezra are you crazy.” I say, “Stop Zeb, this is for

Kannan this might be the only chance we get to save him.”Maul says, “Well it looks like we now have a deal.” Hera says, “Then I guess we do have an deal.”

## *CHAPTER 7*

Maul, Hera and I walk into the command center, we circle around the holotable with Commander Sato. I say to Commander, "This is Maul he agreed to help us get Kannan back." Commander Sato says, "Hello Maul, I am glad that you agreed to help us." Maul answers, "Will we have our deals." Hera says, "We have a plan everyone." Maul says, "Explain the plan." Hera says, "A small part of our run away fleet will attack the imperial fleet from the north side of the planet. The rest of our fleet will emerge to the west side of the planet and we will send in x-wing's starfighters with y-wing support to bomb this structure here on the planet." I say, "What is that building?" Maul says, "That building there is the home and headquarters of Darth Vader." Hera says, "So we will send u-wings to the castle and launch troops and make our way into the castle and rescue Kannan." Commander Sato says, "I suggest we begin our attack soon." Hera says, "Before we can rescue Kannan from Vader, we need to get some fuel for our y-wing's." Mail says, "On the planet Corellia there is all the fuel you would ever need, for the fleet." Commander Sato pulled up the file on the holotable and said, "We can make the jump to

hyperspace and steal the fuel from the empire.” I say, “Then lets go to Corellia.” Commander Sato put in the cordinates and the fleet jumped to hyperspace. Hera and I walked back to the Ghost and prepared to come out of hyperspace. Sabine says “Where are we going?” I say, “We are going to steel fuel from the empire.” Zeb says, “I thought we were going to rescue Kannan.” Hera says, “We are soon as we get fuel for our star fighters.” Our fleet jumped out of hyperspace there was three imperal light cruisers along with two transports over the planet. Hera says, “Everyone get to you battle positions.” Hera and Sabine managed to fly, While Zeb and I maned the guns with our astromech droid named Chopper. We flew out of the light carrier with one of the GR-75 medium transports and a-wing starfighters. Hera scanded the transports and the fuel was in the transports. Hera contacted all piolts and said, “All piolts the fuel is not on the planet, it is in the transports.” The piolts contacted back and said, “Copy that General Syndulla we will target the light cruisers.” Hera said to Zeb and I, “Get in the Phantom and dock with the transports and steel the fuel.” Zeb says, “On it Hera.” Zeb and I run to the Phantom and undocked from the ghost. I flew towards the transports and I shot open a hole in the transport. Zeb put on his oxygen mask and jumped in the transport. Stormtroopers were everywhere I threw my lightsaber down to Zeb, Zeb eghinighted the saber and sliced up the stormtroopers. Zeb made his way to the cargo room and grabed the fuel canasters he walked back up to the Phantom. I helped Zeb get into the Phantom with

the fuel and the A-wing's fired on the transports soon as we flew towards the Ghost. The a-wings destroyed the transport everyone could see the flames and the vessel falling from the sky, crashing into the atmosphere. Commander Sato contacted the fleet and said, "All pilots make your way to light carrier." All the pilots made their way to the light carrier and the fleet jumped to hyperspace. The fleet was in hyperspace and making our way to Mustafar. Commander Sato requested our team to the control room. Zeb, Sabine, Chopper, Hera and I walked in the control room. Maul said, "We will need to exit hyperspace now team to reach the north side of the planet." Hera said we will leave as soon as the pilots are ready. Commander Sato said, "Our pilots are ready general Syndulla." Hera says, "Good we will leave now then." Commander Sato said, "May the force be with you." Maul started laughing and said, "That is a term I haven't heard in a long time."

## *CHAPTER 8*

We walked to the Ghost and we started to leave, We flew out of the light carrier along with Maul's red Mandlorian fighter with three x-wings and two GR-75 medium transports. We recalculated the jump to the planet of Mustafar and we pulled the hyperdrive. Zeb, Chopper and I walked into the living quarter room. Hera says, "Everyone knows the plan right." Sabine says, "I have a question." Hera answers, "What is the question?" Sabine says, "Vader is he there?" I say, "I don't sense his presence at his castle." Hera says, "Will that answers your question then Sabine." Chopper ran up to us and said, "Exit hyperspace." No one could understand him but Hera and I. Zeb and Sabine only hear beap, beap, beap.

Our small strike team made our way out of hyperspace on the North side where there was no Star Destroyers. I was pretty sure the empire saw us but the rest of our fleet made its way here. The two Nebulon Medical Frigates, four Blockade Runner's and three GR-75 Medium Transports made their way to the Imperial fleet that consisted of three Star Destroyers and two light cruisers. Commander Sato sent

in the a-wing fighters against the tie fighters. The Imperial fleet must have been Grand Admiral Thrawn fleet, he has some great art work on the bottom of his Star Destroyer. Grand Admiral Thrawn's Star Destroyer started to fire upon our fleet. The y-wing bomber were fast and piloted by Hobbie's unit of pilots. The y-wings flew in under the surface of the Star Destroyer dropping the ion torpedos destroying the auxiliary power in the star destroyer. The Rebel fleet was holding off from the Empire very well, better than I expected.

Our team made our way in the planet, there was the large building of Vaders. We saw the small landing platform we sent in our GR-75 transport to land. Soon as you know it tie fighters are flying all over firing at our x-wings. Hera dropped us off at the landing pad with Maul. Hera says, "Contact me to pick you up when you are ready." I answer, "Ok." Hera flew off to help out the fleet.

We approached the blast door with Maul and the troops. Maul says, "Sabine and Zeb lead the troops into battle while Ezra and I find Kannan." Zeb says, "Then I am in charge." The blast door opened and there were Death Troopers. The Death Troopers fired on our people, Maul ignited his lightsaber and cut all of the troops into pieces. Maul says, "Sabine be on look out for these troopers." Sabine answers,

“I will be.” We split up into two groups Sabine, Zeb and the troops were to set explosives in the castle while Maul and I find Kannan.

We ran in the building I felt the darkness, the coldness and the fear, these feelings are the powers of the dark side. We ran to the elevator right next to the entrance door and we pressed on the key holding cells. Maul says, “I feel Vader, he is close I sense it.” I answer, “So do I.” We exited the elevator there were screams I heard we went to the holding cell with the screams. We opened the door and there were two death troopers and I grabbed my blaster and I shot one of them while Maul choked one out using the force. There was Kannan I undid his shackles. Kannan fell to the ground. I helped him get up. I say, “Hello master.” Kannan laughed and said, “The rebellion did come back for me, I am glad to see you Ezra.” Maul says, “Then we should get going.” Kannan says, “Why is he here Ezra?” I say, “We needed help.” We walked out of the holding room and I saw a red lightsaber and a dark figure I heard the breathing threw his helmet, I knew at once it was not Darth Vader.

## *CHAPTER 9*

Who I thought who was Vader was really a Inquistor named the tenth brother. He was walking up towards Kannan, Maul and I we all egighted our lightsabers. The tenth brother says, "Will the shadow decideds to finnaly face me." Maul answers, "Will it looks like another Inquistor, a grand Inqistor." Maul ran up to the Inquistor and struck his lightsaber towards his face and the tenth brother hit his lightsaber out of his hand. Maul used the force and forced his lightsaber back to him. The tenth brother came closer and closer to us, I contaced Sabine and said "Light it up now." There was a massive explosion everywhere the inquistor fell down through the floor. Kannan says, "Lets get out of here." I say, "Agreed." As we walk outside ththere is Sabine and Zeb and our troops. As we walk out the Inquistor approached us again. I say to Kannan "Get to the transport now." Kannan answers, "Why?" I say, "Because you are blind you cant see." Kannan says, "What is there." I say "The Inquistor is here again." Zeb walked Kannan to the GR-75 medium transport. I say to Sabine, "Contact Hera to get over now." Sabine answers, "Ok got it." Sabine contacted Hera and Sabine said, "Hera we need a pick up fast." Hera

answers, "I am on it." Do you guys have Kannan?" Sabine answers, "Yeah we have him." Hera says "I am on my way."

Maul says, "Ezra you need to go now." Maul threw his lightsaber at the inquisitor. The tenth brother says, "Weak you are Maul, now here you shall die here along with the Jedi. Hera flew the Ghost towards the exploded castle and fired at the inquisitor. The tenth brother reflected the blast. We all ran towards the Ghost, Hera lowered the ramp we grabbed Kannan and ran up the ramp. Maul yells, "I will be there soon." I yell, "Get in your fighter now Maul." Maul ran to his Madlorian fighter and took off along with the transports and us.

The Tenth Brother contacted Grand Admiral Thrawn, Thrawn answered he said "What do you need Tenth Brother." The inquisitor said, "Launch tie defenders on the rebel fleet." Thrawn says, "Yes sir."

The Rebel strike team was making our way back to the rebel fleet over the planet of Mustafar. The empire sent tie-defenders after our fleet, the tie-defenders fired there turbo lasers at our medical frigits the x-wings chased the tie-defenders but the tie-defenders had defense shields protecteing the ship. Grand admiral Thrawn

flew his imperial shuttle to our light carrier and boarded it. The a-wings shot down one of the sub light engines in Thrawns shuttle. Thrawn crashed landed in the hanger.

Rebel fleet troopers moved in on the crashed imperial shuttle. Death troopers ran out of the crashed shuttle and shot blasts at our men. We just landed in the light carrier, I ran out and reflected every blast back at the troops. I ran inside the crashed shuttle, there was an holo transmitter, I picked it up and Thrawn came up on the transmission. Thrawn said on the transmitter, "Hello Jedi you have all won the ground battle, but the war will be mine to claim victory." I answer, "No you are the one who lost." Kannan walked in the shuttle he said, "What is this Ezra?" I answer, "Thrawn just ended this transmission he left this here and said to me the war is his." Kannan says "Destroy that before they can track us when we leave." I say "Ok."

Commander Sato contacted Hera and said, "General Syndulla we can't go back to Yavin IV the empire found our base and will target it next with the Death Star." Hera says, "Let's go to Alderaan." Commander Sato answers, "We can't the Empire destroyed it with the Death Star, Bail Organa died." Hera says, "No." I say to Hera, "Where are we going to go?" Hera answers, "Nowhere as of right now."

The rebel fleet was holding off the empire's fleet and before we knew it multiple ships were jumping out of hyperspace. Three Mon Calmari star cruisers, two Hammerhead Corvettes and two Nebulon Medical Frigates jumped out of hyperspace. The Mon Calmari star cruiser contacted us and said, "Attention all ships follow our lead and make your way to Yavin IV, the Death Star has been destroyed by a new recruit named Luke Skywalker. Three B-wing star fighters made their way to the Star Destroyers and used their four turbo lasers and ion cannons to destroy a Star Destroyer. All of the rebel star cruiser's and starfighters jumped to hyperspace.

## *CHAPTER 10*

The Rebel fleet just made our way to Yavin IV we flew the Ghost into the moon and landed. Hera says, "I am glad the Death Star has been destroyed, and I have my family back again. Kannan says, "I am glad to see you guys." Hera walks up to Kannan and hugs him. We walk down the ramp of the Ghost and walk inside the mynock temple. Mon Montha approached us, she said, "Congrats to rescuing Kannan General Syndulla." Hera says, "Thank you senator."

As my team watched the pilots get medals for destroying the Death Star, Kannan and I flew the Phantom to the light carrier. Kannan says, "Ezra thank you for saving me back there." I answer, "Your welcome master." I put in the landing gears to land the Phantom in the light carrier. As we landed Maul was packing his belongings. Kannan and I walked up to Maul and said, "Thank you for helping us." Maul says, "We have a deal right Ezra?" I say, "No you owed me." Maul yells,

“What did I owe you?” I answer, “You blinded my master.” Maul says, “Now you owe me one Ezra Bridger.” He walked up his ship and flew off. Kannan said to me, “What was the deal?” I say, “I would have to become his apprentice.” Kannan says, “Let’s not trust him anymore, we will team up with Rider Azadi.” I say, “Speaking of Rider where is he?” Kannan says, “In the command room.” I say, “I am going to talk to him.”

I walk into the command room where Rider Azadi is. I say, “Rider Azadi thank you for helping us.” Rider Azadi says, “Ezra don’t thank me, I will help you Rebel’s anytime.” I say, “Thanks.” Kannan, Hera, Sabine, and Zeb walk in the command room. Hera says, “Now we are all apart of the rebellion let’s find a new base.” I say, “Rider you joined us?” Rider answers, “I shure did.” Kannan says, “Now we all are family.”

In this novel of the “Story of the Ghost” Jedi master Kannan Jarus gets captured by the evil Darth Vader and it is up to the rebels to help save him from the empire. Ezra Bridger, Sabine Wren, and Garazeb Orrelios get separated from the Rebellion and they must do unlikely things to get Kannan back and make their way back home to the rebellion base on the planet Yavin IV.
